PROFESSIONAL SUMMARY

Computer Science undergraduate (Batch 2027) with hands-on experience in software engineering and full-stack web development using Java, Python, React.js, Node.js, Express.js, and MongoDB. Developed scalable web applications, secure REST APIs, and responsive user interfaces while applying object-oriented programming, data structures, and software design principles. Passionate about solving technical challenges, learning new technologies, and contributing to collaborative software development teams.

EXPERIENCE

- 02/2026 – 03/2026
- Axcentra, (Intern)**
 - Processed and cleaned **1,000+ structured records** using Python and Pandas to improve dataset quality.
 - Performed exploratory data analysis and visualization to identify trends and support predictive modeling.
 - Evaluated machine learning models and documented findings for performance improvement.
 - Collaborated with mentors and completed weekly project deliverables on schedule.

EDUCATION

- 2024 – 2027
- Atria Institute of Technology**, Bachelor of Engineering in Computer Science and Design
CGPA - 8.63

SKILLS

- Programming languages**
Python, Java, C, C++,SQL
- Frontend Development**
HTML, CSS, PHP,JavaScript,
UI/UX Design, Figma,
Responsive Web Design,
React.js
- Backend Development**
Node.js, Databases, MongoDB,
MySQL, Oracle
- Tools & Technologies**
Git, GitHub, VS Code,
Figma
- Core concepts**
Data Structures & Algorithm, Object-
Oriented Programing(OOP), DBMS,
Operating Systems, Computer
Networks, Problem solving

CERTIFICATIONS

- Infosys Programming in C
 - Infosys Network Fundamentals
- Solutions Architecture Job Simulation - Amazon
- Infosys DevOps Fundamentals

ACHIEVEMENTS

Finalist in RDBMS Hackathon

Active Participation in Scientia Events and Hackathon

Volunteer and participation in Sapthrang college fests

PROJECTS

Employee Management System

- Developed a role-based Employee Management System using **React.js, Node.js, Express.js, and MongoDB**.
- Built secure RESTful APIs for employee records, attendance, and department management.
- Implemented JWT authentication and role-based authorization for secure access.
- Designed responsive React components with CRUD operations and efficient MongoDB queries.
- Managed project version control using Git and GitHub.
- **Optimized application performance through efficient database queries and modular backend architecture, ensuring scalable and reliable system operations**

Shop Sphere - Full Stack E-Commerce Platform

- Engineered a full-stack e-commerce application using **React.js, Node.js, Express.js, and MongoDB** with a scalable and modular architecture.
- Developed **12+ RESTful APIs** for user authentication, product management, cart, orders, and inventory operations.
- Implemented **JWT-based authentication** and role-based authorization to ensure secure user access and data protection.
- Optimized **MongoDB queries** and backend API performance, reducing response time by **30%**.
- Designed responsive and reusable React components with features including product search, filtering, shopping cart, checkout, and order management.
- Integrated frontend and backend services using REST APIs while following MVC architecture and best coding practices.
- Utilized **Git and GitHub** for version control, code management, and collaborative development
