Summary

Computer Science undergraduate with hands-on experience in full-stack and backend software development, building RESTful APIs, database-driven applications, and secure web applications. Proficient in Java, JavaScript, Python, SQL, React.js, Node.js, and PostgreSQL, with a strong foundation in object-oriented programming, data structures, and databases. Experienced in developing applications with authentication, role-based access control, API integration, and structured data management.

Education

Atria Institute of Technology, Bengaluru 2023–2027
Bachelor of Engineering in Computer Science and Design
CGPA: 8.63 / 10

Projects

IROPS Rebooking Engine — Airline Disruption Management System

- Developed an airline rebooking system for flight delays and cancellations.
- Implemented rebooking logic based on **seat availability, fare rules, connection times, and loyalty tiers**.
- Designed **REST APIs and transactional workflows** for reliable booking and seat management.

AI Tumor Board — Clinical Collaboration Platform

- Built a secure platform for doctors to manage patient cases, reports, imaging, and treatments.
- Implemented **authentication, protected routes, search, filtering, and analytics**.

Distributed Workflow & Job Orchestration Platform

- Developed a distributed job processing platform to schedule, execute, and monitor background workflows.
- Implemented **Apache Kafka**-based asynchronous processing, automatic retries, and failure handling.
- Built a **React** dashboard for real-time job status and execution tracking.
- Implemented **JWT authentication, role-based access control, and Docker containerization**.

Shop Sphere — Full-Stack E-Commerce Platform

- Built **12+ REST APIs** for authentication, products, carts, orders, and inventory.
- Implemented JWT authentication and role-based authorization.
- Optimized **MongoDB queries, reducing API response time by 30%**.

Core Skills

Programming Languages: Java, Python, JavaScript, TypeScript, SQL, C++
Backend Development: Spring Boot, Node.js, Express.js, REST APIs, JWT Authentication
Frontend Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM
DevOps & Cloud: Git, GitHub, Docker, AWS EC2, Maven

Internship

Accenture — Data Science Intern Feb 2026 – Mar 2026

- Processed and cleaned **10,000+ records** using Python and Pandas.
- Performed exploratory data analysis and visualization to identify trends.
- Evaluated machine learning models and documented performance findings.

Certifications

Java Programming Fundamentals for Spring Boot Development — Infosys Springboard
API Testing & Automation with Postman Specialization — Coursera
Java SE 21 Fundamentals: Syntax, Control Flow, and Core APIs — Coursera
Infosys NewFundamentals
Infosys DevOps Fundamentals
Solutions Architecture Job Simulation — Amazon/Forage
